SUMMARY

Full-stack engineer with 5 years of building B2B SaaS and AI products from first commit to production. I head engineering at a commerce-software company. As a freelancer, I lead products for US clients and a chess academy with 10,000+ families. I own architecture, code, cloud infrastructure, and releases, with a focus on LLM features that stay reliable in production.

SKILLS

Languages: TypeScript, JavaScript, Python, SQL, Swift
Frontend: React, Next.js, Tailwind CSS, shadcn/ui, TanStack Query, React Native, Expo
Backend: Node.js, Bun, Express, GraphQL (Apollo, TypeGraphQL), tRPC, FastAPI, REST, WebSockets
Data: PostgreSQL, MongoDB, Drizzle, TypeORM, Prisma, Redis, BullMQ, Celery, ClickHouse, MeiliSearch, pgvector
AI: Vercel AI SDK, OpenAI and Anthropic APIs, RAG, tool-calling agents, structured outputs, LLM evals, LiveKit voice
Cloud: GCP (Cloud Run, Cloud SQL), AWS (ECS, EC2, S3, SES), Terraform, Docker, CI/CD, OpenTelemetry, Sentry
Auth and payments: Better Auth, OAuth 2.0, passkeys, RBAC, Stripe, PayPal, Razorpay, Chargebee, Shopify apps

EXPERIENCE

Director & Head of Engineering Oct 2021 – Present
The Developer Company Pvt. Ltd. (TDCCommerce) | Udaipur, India

- Core engineer on TDCCommerce since launch, a multi-tenant commerce ERP processing about 9,000 orders a month.
- Built SuperSearch: a query builder with pivots, grouping, scheduled searches, and streamed exports.
- Built payment reconciliation across Stripe, PayPal, Razorpay, and Plaid, including payout matching.
- Built an AI import assistant: LLM column mapping, PDF table extraction, and streaming 250 MB CSV imports.
- Built the OAuth 2.0 server and control plane that provisions each tenant on Cloud Run with its own domain.
- Run per-tenant GCP infrastructure in Terraform across 2 regions: Cloud Run, Cloud SQL, and Memorystore.
- Shipped usage billing and helpdesk routing for TIA, an embeddable AI agent with RAG, tools, and voice.
- Built Google Ads attribution, KPI alerts, Twilio calling, passkeys, and a Shopify AI order-checking app.
- Lead releases, code review, and engineering standards, and mentor the developers.

Freelance Lead Engineer Aug 2025 – Present
Self-employed | Remote, for clients in the US and India

Amplify Lead Solutions and AMPCO Contracting (California, US)

- Sole engineer on Bid-Board, a multi-tenant CRM with 20+ active users: GraphQL, real-time chat, RBAC, billing.
- Built its AWS SES email platform: inbound threading, open and click tracking, bulk sends, and automations.
- Built LeadMiner, an AI pipeline that turns California environmental filings into 10+ approved leads a day.
- Built ProofStory, where a tool-using AI agent turns project footage into edited videos (Remotion, AWS ECS).
- Shipped a native SwiftUI iOS app for AMPCO's guest events, with scheduled push alerts sent by staff.

Kingdom of Chess (chess academy for 10,000+ families in 30+ countries) | Aug 2025 – Jan 2026

- Lead developer on the academy's admin, coach, and student apps (Next.js, FastAPI, MongoDB).
- Built the chess curriculum: a shared PGN library with folders and search, plus a coach lesson board.
- Built chess puzzle quizzes with levels, scoring, time limits, analytics, and leaderboards.
- Built Microsoft Teams classes with auto-created meetings and saved recordings, plus WhatsApp reminders.
